

Financial Controller and Commercial Project Manager

The Opportunity

We currently have an opening for a financial controller and commercial project manager to ensure our strategic direction is backed up with necessary financial control and keep track of company performance overall for all aspects of the business that can be measured. Rope Robotics offers a progressive working environment with a broad range of responsibilities. You will be part of a small and efficient team where the distance from idea to action is short.

The Job:

- Financial controlling and reporting to management, board meetings and project steering committee meetings
- Ensure that management has all the relevant financial models and budget available and are up to date
- Manage and execute reporting related to our portfolio of public funded R&D projects e.g., the Horizon Europe or Grand Solution programs
- Provide inputs and ideas to our future strategies and business development

Who are we looking for?

We are looking for someone who has a systematic and result oriented approach to work. In this role it will be crucial to keep track of your tasks and their effect on other projects. You can take on responsibility independently and have a hands-on approach where you are ready to support the day-to-day administrative tasks. Finding a solution today rather than tomorrow should always be your mantra, while keeping the big picture in mind.

Skills and personal competencies:

- Experience using E-Economics, etc.
- Excel is the best tool...
- You have a background as Cand.merc.aud or equivalent in financial controlling
- Good social skills and a humorous yet serious approach to work

This is Rope Robotics

Did you know that a wind turbine blade can be repaired only 20% of the time during a year and it requires a man to climb up with the support of ropes? Rope Robotics has developed the world first blade maintenance robot to reduce the cost of green wind power and improve the working environment of service technicians. Rope Robotics is located in Aarhus with 17 employees currently. We are a young/dedicated team that offers a variety of benefits such as weekly exercise (Running or MTB) and canteen. We have our robots working in various places around the world and have received major funding from the EU and Danish Government. And the future looks exciting!

How to apply

We offer exciting challenges in an innovative company at the leading edge of robot technology.

For further information, please contact Martin Huus Bjerge on tel.: +45 61772641 or by e-mail in English or Danish job@RopeRobotics.com.

Your job application should also be sent by e-mail in English or Danish to job@RopeRobotics.com

Job interviews will start from week 43, and job start as soon as possible.
